

A shared error can leave the check unchanged

A · Before a shared shift

Their difference is zero.

B · After a shared shift

Both move by the same amount: still zero.

$$(\text{control} + \text{shift}) - (\text{graticule} + \text{shift}) = \text{control} - \text{graticule}$$

Measured in L7014: all 269 displaced sheets passed; median displacement 455 m.
